Hardy Apricot Trees

Variety	Flavor/Uses	Pollination	Ripens (Paint Code- Office Use)
Manchurian Apricot (Yellow, blush of red fruit color)	Small, fast growing, rounded form. White flowers and gold orange fall color and fruit- best for jams/jelly	Requires Pollinator 1” fruit. Very hardy. Zone 3	August. Grows about 10-15’ tall and 12-18’ wide.
Moongold Apricot (Light Orange Color)	Flavor is sweet but has slight acidity.	Requires Pollinator. 1.75” Fruit. Zone 4	Late July - Freestone (No Paint Code)
Scout Apricot (Bronze Gold-Red)	Canning, jams, fair eating	Self-Fruitful, produces more with pollinator. Zone 3	Early August-Freestone (Green Paint Code)
Sungold Apricot (Bright clear gold)	Mild, sweet flavor, great eating, sauce and jams	Requires Pollinator 1.25” fruit. Zone 4	Early August. Freestone (Orange Paint Code)

Hardy Cherry Trees

Variety	Flavor/Uses	Pollination	Ripens
Evans Bali Cherry (Deep Dark Red Fruit)	Excellent for baking and fresh eating	Self-Fruitful. 1” Fruit. Zone 3	August. Sour- to sweet (White Paint Code)
Meteor Cherry (Bright Red)	Mild acid in flavor. Fine for sauce & pie	Self-Fruitful. Large fruit. Zone 4	Early July – Sour (Pink Paint Code)
North Star Cherry (Red Fruit)	A great sour pie cherry	Self-Fruitful. Very productive. Zone 4	Late June – Sour (No Paint Code)
Rainier Sweet Cherry (Golden Yellow, red blush)	Large, beautiful, cherry. Sweet, rich flavored, firm & juicy.	Requires pollinator. Zone 5	Mid-Late June – Sweet (Purple paint code)

*Many fruit trees tend to produce more fruit with another tree, even if it is self-fruitful.

*Pollinator trees should be the same fruit but different variety.
