## Hardy Peach Trees

Variety	Flavor	Pollination/Zone	Ripens
Bailey Hardy Peach	Good size and eating quality. The sweet, juicy flesh is excellent for fresh eating, sauces and baking.	Self-Fruitful. Zone 5. Semi-Freestone	Mid-August (Pink Paint Code)
Contender Peach	Peach with bright yellow flesh. Sweet, extra-juicy fruit is an absolute delight for fresh eating, canning, baking and freezing.	Self-Fruitful. Zone 4. Freestone.	Mid-late August. (Orange Paint Code)
Reliance Peach	Bright yellow flesh, juicy, soft fruit. Medium sized, roundish, yellow-fleshed peach with a dull blush over green-yellow color. Fair flavor.	Self-Fruitful. Zone 5. Freestone	Early August (Yellow Paint Code)

\*Although many are self-fruitful, studies have shown that greater yields are produced when two different varieties of the same fruit are planted near one another to help cross pollinate.
